Director's Message

Dear Valued Partners and Clients,

Greetings from Goose, where our journey has been as inspiring as the majestic flight of a goose – fueled by determination and a commitment to nature's resilience. Since our inception, we've transformed from archiving pioneers to a leading Automation & Technical Service provider, drawing inspiration from the collaborative and purpose-driven flight of geese.

In the spirit of the goose, we soar to new heights of excellence and innovation in every project. Our dedication to perfection in Dairy automation is a testament to our journey's evolution, marked by a continuous blend of technology and automation development knowledge. Our services resonate loudly, delivering impactful results that elevate business intelligence, saving both time and resources.

The flight of a goose symbolizes teamwork, and so does our approach to serving you. We anticipate the opportunity to showcase the excellence and dedication that define Goose – a brand inspired by nature's beauty and the power of purposeful engineering. Our commitment to sustainability is woven into every aspect of our work, steering towards a better future.

Thank you for considering Goose as your trusted Technical Service and Automation partner. We look forward to navigating the skies of innovation together.

Warm regards,

Fenil Cyriac
Managing Director, Goose - The Brand of Nature

“Protecting nature is not an option, it's a necessity.”

About Us:

Founded in 2017 as a "Technical Service Automation & Maintenance company for the Food and Beverage Industry," we, at Goose, have consistently been at the forefront of addressing plant productivity challenges faced by dairy plant owners. Our initial focus on plant upgrades with automation has evolved into a comprehensive suite of services, extending to industrial automation, Annual Maintenance Contracts (AMC), and technical services for diverse industries such as Marine, Oil and Gas, Brewery, Pharma, Renewable energy etc

Driven by a vision to develop purposeful engineered solutions with sustainability at the core, our tagline, "The Brand of Nature," symbolizes our commitment to optimizing processes through automation skills and limited investments. As a trusted partner, we guide businesses through the intricacies of the modern competitive landscape, prioritizing sustainability in every aspect of our operations.

Our Purpose: Engineering for a Better Future

Our Mission: To develop systems, methods, technologies, and teams that provide an enhanced customer experience for technical service, automation, and maintenance support for the next generation of plants and machinery, operating in various critical conditions.

Our Vision: To become the global technical service partner for industries, ensuring the mindful operation of machines with exceptional productivity, adaptability, and automation advancements. Our futuristic engineering capabilities and hi-tech manufacturing setup aim to elevate industries across the planet. As Goose flies to the next generation, so do we, embracing the challenges of a sustainable and dynamic future.

Clientele

We are proud of our extensive track record of successful partnerships with businesses and organizations spanning different industries. Our dedication to achieving excellence and ensuring customer contentment has enabled us to forge enduring connections and provide exceptional outcomes for our esteemed clientele.

Here are the primary sectors we serve:

Government: We've partnered with government agencies, providing automation solutions, technical services, AMC, and SCADA and MIS & MES software development to streamline their operations and boost efficiency.

Engineering: Our proficiency in heavy engineering and fabrication of plant and machinery, along with automation capabilities, plays a crucial role in assisting engineering firms.

Renewable Energy: Our offerings for the renewable energy sector, involving electrification and automation, especially for solar systems, position Goose as the green partner for Fenice Energy, offering and implementing solar systems in India.

Dairy Industry: Our expertise in dairy processing and aseptic technology, combined with automation, maintenance, equipment manufacturing, and turnkey project management capabilities, ensures modernized milk and milk products manufacturing in a smart way.

Pharmaceutical: The pharmaceutical industry demands precision and compliance. Our data management and document scanning services assist pharmaceutical companies in maintaining accurate records and meeting regulatory demands.

Beverages: Our knowledge of non-alcoholic beverage processing enables us to offer complete automated lines for processing beverages in different formats like PET bottles, aseptic cartons, paper boats, and tin. Our skid-mounted multiproduct processing aseptic sterilizer is an innovative development for the industry.

Marine: Goose specializes in automation, electrical, and maintenance services tailored for the demanding marine industry. From precision automation solutions in shipbuilding to comprehensive electrical systems and ongoing maintenance services, we strive for excellence in marine engineering, keeping your ships at the forefront of efficiency and innovation.

Oil & Gas: With experiences in process automation, especially in AB & Siemens, along with panel building capabilities, we offer a wide range of industrial automation solutions to the Oil & Gas industry.

Services

Our dedication to excellence and offer the superior customer experience motivates us to offer a wide array of Technical services tailored to domain specific. We are proud to provide the quality and systematic technical services with a better automation and maintain the with options of AMC and maintenance support. Our upcoming virtual space to offer experience new way of technical support will be revolutionary and helpful for plant operators, maintenance team and other functions to ensure the productivity of the plant by reducing the down time.

Our commitment to delivering outstanding solutions and quality distinguishes us. Whether you require support with automation, annual maintenance supports, develop a critical equipment, or fabricate a mechanical system to support the automation, Goose® is your dependable partner. We combine technical expertise, creativity, and innovation to deliver comprehensive solutions that align with your unique needs and contribute to your success.

Plant Technical Audit : In-depth analysis is pivotal for successful system development. Our technical audits and studies involve thorough field assessments, audits, and systematic reports. We focus on understanding requirements, identifying areas for improvement, optimizing processes, and delivering clear and impressive reports that communicate the automation scope effectively

Automation Design:

We provide post a detailed study, signing off on systems and solutions demands that automation justifies its purpose and investment. Our team, comprising experienced automation system designers in electrical, instrumentation, and mechanical design, ensures the generation of optimized solution designs with a clear execution plan..

Product Selection : In engineering a solution, the precise choice of hardware and software is crucial. Incorrect selections can lead to future system damage or issues during execution. Goose ensures a meticulous product selection based on design, carried out by experienced professionals.

Process Engineering :

Process engineering relies on experience and know-how, and Goose's expertise in dairy, beverage, and aseptic processing allows us to craft the best and updated solutions with practical insights. Thanks to our domain experts in dairy technologies and aseptic processes, Goose is well-equipped to excel in critical and futuristic process engineering.

Machine Design:

Machine design is an art, emphasizing simplicity and efficiency for prolonged lifespan and

ease of operation. Utilizing advanced software, simulation, and testing tools for analysis, Goose efficiently designs primary machines and secondary lines with minimal maintenance in a shorter timeframe.

Equipment Manufacturing :

Goose's primary focus has been manufacturing special-purpose machines, packaging lines, and process equipment. With a showcase of numerous installations highlighting our capabilities, our 20,000 sq feet fabrication and heavy engineering facility in Pune, Maharashtra, under Milkon Heavy Engineering (a group company of Goose), produces state-of-the-art machinery. Additionally, our Goose Global Engineering Centre in Chikali, Pune, is dedicated to machine development, R&D, and testing.

Control Panel Building :

In an industry filled with panel builders, Goose stands out for its systematic control panel building approach with futuristic strategies. Thanks to our electrical team and collaborations with Siemens, Rittal, LAP, Wagon, B&R, we ensure the delivery of quality panels for our systems..

PLC & SCADA Integration :

Goose has invested in ready-to-use customized program libraries for various applications, incorporating fail-safe and redundancy scripts. Our focus on program development structure and syntax is crucial for efficient program execution, ensuring a systematic briefing for future PLC program developers. With one of the best programming teams in India, Goose excels in scripting SCADA, designing graphics, developing recipe settings, and generating reports that meet global standards.

Project Management:

In the solution delivery process, the critical stage is the execution, encompassing system installation, commissioning, testing, production, training, and handover. Leveraging our experience in delivering food processing turnkey projects, Goose has developed an ideal system and a skilled team capable of managing any project, regardless of size. Our project management software and dedicated engineers ensure a superior customer experience at every stage of the project.

AMC & Maintenance :

Unlock peak performance for your plant with Goose's Annual Maintenance Contract (AMC) and maintenance services. Our goal is to enhance plant productivity, minimize downtime, and reduce costs by aligning critical factors such as automation, electrical, mechanical, pneumatic,

and hydraulic systems. Recognizing a significant gap and opportunity in maintenance services, Goose is here to revolutionize the industry, ensuring seamless operations and optimized efficiency for your plant. Experience the difference with Goose's cutting-edge maintenance offerings.

Goose Hydraulics and Pneumatics:

Goose excels in providing top-tier hydraulics and pneumatics technical services across diverse sectors, including Food and Beverage, Oil and Gas, Marine, and more. With a specialized focus on hydraulic cylinders and systems, Goose brings unparalleled expertise to ensure optimal functionality and reliability in critical industrial processes. Our adept team, coupled with cutting-edge technology, delivers innovative solutions tailored to the unique needs of each industry, solidifying Goose's reputation as a trusted partner in hydraulic and pneumatic excellence.

Product Trading :

we prioritize the use of high-quality products in engineering, considering it fundamental to achieving excellence. Operating as a trusted trader, we offer the industry an array of genuine components under our "Options & Solutions" framework. This not only ensures a seamless experience in the buying process but also facilitates effortless selection, application, and integration. Our product lineup includes Siemens automation products, Rockwell systems, Festo & SMC Pneumatic products, Omron systems, B&R Systems, AlfaLaval valves and fittings, Baumer pressure sensors, and Forms Marshall steam control valves – a comprehensive suite that reflects our commitment to delivering top-notch solutions.

Training Solutions :

The formation of our Training Department signifies Goose's commitment to upskilling engineers in technical service and automation. Geared towards enhancing agility and scaling up our global business, our training programs are not exclusive to our engineers; we extend the same offerings to our customers. This includes training programs for operators and maintenance teams, aligning skills with the latest industry trends. Additionally, we run seasonal batches to mould freshers through our Industrial Connect Program, providing them with valuable insights and support as they

Why Goose® ?

Indeed, Goose® boasts a rich history and a transformative flight that have shaped it into a comprehensive industrial automation and technical service provider. This evolution highlights several key strengths that make our company an attractive choice for potential

Partners:

Automation, Service ,Mechanical ,Hydraulics , Pneumatics Experience: With a history of longevity and accumulated experience, we bring a deep understanding of the industrial automation solutions to our clients.

Adaptability and Evolution:

Our ability to adapt and evolve with changing technology trends ensures that we stay relevant and effective in addressing advancements in automation needs.

Diverse Service Offerings:

We provide a wide range of services, catering to various Industrial automation requirements , offering comprehensive solutions under one roof.

Vision and Alignment:

Our strategic vision aligns with the evolving needs of businesses, ensuring that our technical services remain forward-looking and in sync with industry trends.

Competitive Advantage:

We offer a competitive edge through our innovative solutions, which empower businesses to excel in their respective industries.

Customer-Centric Approach:

Our commitment to putting our customers at the forefront of everything we do ensures that we consistently deliver value and satisfaction.

Confidentiality:

A trusted name where you can safely place your valuable data.

Overall, our history, adaptability, and dedication to meeting the industrial automation needs of businesses position us as a compelling choice for organizations seeking top-tier automation and plant care solutions and services.
